Journal of Membrane Science 108 (1995) 299–300

journal of MEMBRANE SCIENCE

Contents

Site-directed and random enzyme immobilization on functionalized membranes: kinetic studies and models
S. Vishwanath, D. Bhattacharyya, W. Huang and L.G. Bachas (Lexington, KY, USA) 1
Atomistic modeling of the diffusion of small penetrant molecules in the bulk amorphous polyimide of 3,3′,4,4′-benzophenonetetracarboxylic dianhydride and 2,2-dimethyl-1,3-(4-aminophenoxy)propane
R. Zhang and W.L. Mattice (Akron, OH, USA) 15
Operation parameters of melt spinning of polypropylene hollow fiber membranes
J.-J. Kim, J.R. Hwang, U.Y. Kim and S.S. Kim (Seoul, South Korea) 25
A new class of polyelectrolyte-filled microfiltration membranes with environmentally controlled porosity
A.M. Mika, R.F. Childs, J.M. Dickson, B.E. McCarry (Hamilton, ON, Canada) and D.R. Gagnon (St. Paul, MN, USA) 37
A cross-flow microfiltration model based on integration of the mass transport equation
E. Piron, F. René and E. Latrille (Thiverval Grignon, France) 57
Mobility of cyclohexane in a microporous silica sample: a quasi-elastic neutron scattering and NMR pulsed-field gradient technique study
H. Jobic (Villeurbanne, France), M. Bée (St Martin d'Hères, France), J. Kärger (Leipzig, Germany), R.S. Vartapetian (Moscow, Russia), C. Balzer and A. Julbe (Montpellier, France) 71
Influence of the membrane material on the adsorptive fouling of ultrafiltration membranes
C. Jönsson and A.-S. Jönsson (Lund, Sweden) 79
Electrochemical preparation of polypyrrole membranes and their application in ethanol–cyclohexane separation by pervaporation
M. Zhou, M. Persin (Montpellier, France), W. Kujawski (Torun, Poland) and J. Sarrazin (Montpellier, France) 89
Preparation of sol–gel driven alumina membrane modified by soaking and vapor-deposition method
S.-Y. Lee, S.-J. Lee, S.-J. Kwon, S.-M. Yang and S.B. Park (Taejon, South Korea) 97
Properties of a double layer with asymmetric electrolytes: ion-penetrable membrane carrying nonuniformly distributed fixed charges
J.-P. Hsu and Y.-C. Kuo (Taipei, Taiwan ROC) 107
Filtrate flux in crossflow microfiltration of dilute suspension forming a highly compressible fouling cake-layer
T. Murase, T. Ohn and K. Kimata (Nagoya, Japan) 121
A comparative analysis of flux limit models for ultrafiltration membranes
P. Prádanos (Valladolid, Spain), J. De Abajo, J.G. De la Campa (Madrid, Spain) and A. Hernández (Valladolid, Spain) 129
Protein retention with modified and unmodified inorganic ultrafiltration membranes: model of ionic strength controlled retention
L. Millesime, J. Dulieu and B. Chaufer (Thiais, France) 143
Carrier-mediated, thermal energy-coupled, non-isothermal membrane transport. II. A gaseous system
E. Selegny (Mont Saint Aignan, France), J.N. Ghogomu (City, Cameroon), D. Langevin (Mont Saint Aignan, France), R. Roux (Villeurbanne, Lyon, France) and M. Metayer (Mont Saint Aignan, France) 161
Molecularly imprinted polymeric membranes for optical resolution
M. Yoshikawa, J. Izumi, T. Kitao, S. Koya and S. Sakamoto (Kyoto, Japan) 171
Influence of the layer fixed charge distribution on the performance of an ion-exchange membrane
S. Koter (Torun, Poland) 177
A novel method for the characterisation of the double fixed charge (bipolar) membrane using impedance spectroscopy
T.C. Chilcott, H.G.L. Coster and E.P. George (Sydney NSW, Australia) 185

Meetings calendar 199

Behaviour of citric acid during electrodialysis
S. Novalic, F. Jagschits, J. Okwor and K.D. Kulbe (Vienna, Austria) 201
Preparation and evaluation of a low fouling ultrafiltration membrane made from a biopolymer
E. Attafuah and G.M. Hall (Leicestershire, United Kingdom) 207
The effects of diluent molecular weight on the structure of thermally-induced phase separation membrane
B.J. Cha, K. Char, J.-J. Kim (Seoul, South Korea), S.S. Kim (Kyung Ki-Do, South Korea) and C.K. Kim (Seoul, South Korea) 219
Transport mechanisms in liquid membranes with ion exchange carriers
I.M. Coelhoso, T.F. Moura, J.P.S.G. Crespo and M.J.T. Carrondo (Monte de Caparica, Portugal) 231
Studies of convective transport in evaporative casting of dense polymer films
L. Tan, W.B. Krantz, A.R. Greenberg and R.L. Sani (Boulder, CO, USA) 245
The effects of polymer concentration and a pore-forming agent (PVP) on HEMA-MMA microcapsule structure and permeability
J.R. Hwang and M.V. Sefton (Toronto, Ontario, Canada) 257
Ion separation by bipolar membranes in reverse osmosis
T. Tsuru, S. Nakao and S. Kimura (Bunkyo-ku, Tokyo, Japan) 269
Solubility of light gases in poly(*n*-butyl methacrylate) at elevated pressures
S.M. Nadakatti, J.H. Kim and S.A. Stern (Syracuse, NY, USA) 279
